

Annual Index

Following is the author index for volume 156 of the *Journal*, which covers all material from January 1999 through December 1999. The *Journal* no longer prints a subject index. Two-letter abbreviations are used for months. The complete citation for each article is listed under the name of the first author. Coauthors are listed alphabetically with a cross-reference to the first author; cross-references containing multiple first author names separated by semicolons indicate multiple articles by the coauthor. In addition to being indexed by author name, letters to the Editor regarding articles published in 1999 are indicated in parentheses after the citations for those articles. Entries other than Special Articles, Regular Articles, Commentaries, and Brief Reports are given the following designations: Editorial (editorial), Images in Neuroscience (image, neuro), Images in Psychiatry (image, psych), Clinical Case Conference (case conf), book review (bk rev), letter to the Editor (letter), Official Actions (off acts), and Supplement (suppl). Corrections are cited with the articles to which they refer. In replies to letters to the Editor, semicolons between authors' last names indicate that the reply is to multiple letters.
